

*I like to use a local courier company and I've found Fastway Couriers, Townsville to be very helpful in working with us to get our products out to our consultants all over Queensland. The online Track and Trace facility enables my staff to check exactly where our parcels are on their journey between pick up and destination.*

*We really appreciate having our own dedicated courier and being able to make contact with him direct on his mobile. Our courier works to a set timetable and that suits our business as we always know what time he'll be calling to pick up our parcels.*

*Once or twice I've needed to claim on Fastway's limited liability insurance and I found this really easy to use and simple to follow.]]*
